A) is to be allowed under all circumstances.  B) is to be allowed only if such inequalities benefit everyone.
C) is to be allowed if they benefit the position of the most-advantaged person.  D) is never to be allowed.

37. _____ refers to a situation where a government does not attempt to influence through quotas or duties what its citizens can buy from another country, or what they can produce and sell to another country.
A) Trade bloc  B) Balance of trade  C) Free trade  D) Single window system

38. When a gain of one country results in a loss by another it is called
A) a win-win situation.  B) a zero-sum game.  C) the tragedy of commons.  D) a lose-lose situation.

39. When a country is more efficient than any other country in producing a particular product it is said to have
A) an absolute advantage.  B) mobile resources.  C) a comparative advantage.  D) diminishing returns.

40. The theory of comparative advantage suggests that trade is a
A) zero-sum game.  B) positive-sum game.  C) the tragedy of commons.  D) a lose-lose situation.

41. Which theory predicts that countries will export those goods that make intensive use of factors that are locally abundant, while importing goods that make intensive use of factors that are locally scarce?
A) Heckscher-Ohlin theory  B) Product life-cycle theory  C) Diminishing returns theory  D) New trade theory
42. Identify the most contentious implication of the new trade theory.
A) The argument that a country better endowed with the factors of production will predominate.
B) The argument it generates for government intervention and strategic trade policy.
C) The argument that first mover advantage does not exist.
D) The argument that nations will not benefit from trade if they do not differ in technology.

43. Michael Porter theorizes that four broad attributes of a nation shape the environment in which local firms compete. Which of the following is NOT one among them?
A) Factor endowments  
B) First-mover advantages  
C) Relating and supporting industries  
D) Firm strategy, structure, and rivalry

44. According to Michael Porter, which of the following is an example of an advanced factor?
A) Natural resources  
B) Climate  
C) Demographics  
D) Skilled labor

45. Which of the following theories stresses that some countries specialize in the production and export of particular products not because of underlying differences in factor endowments, but because in certain industries the world market can support only a limited number of firms?
A) New trade  
B) Trade bloc  
C) Free trade  
D) Balance of trade

46. Identify the main flaw with mercantilism.
A) Stating that it is in a country's best interests to maintain a trade surplus.
B) Advocating government intervention to achieve a surplus in the balance of trade.
C) Limiting imports by tariffs and quotas, while exports were subsidized.
D) Viewing trade as one in which a gain by one country results in a loss by another.

47. Country A can produce 10 tons of cotton and 25 tons of sugarcane. Country B can produce 8 tons of cotton and 26 tons of sugarcane. Country C can produce 11 tons of cotton and 23 tons of sugarcane, while country D can produce 6 tons of cotton and 25 tons of sugarcane. All these countries use the same amount of resources. Which country is said to have an absolute advantage in the production of both the products in this simple assumption?
A) Country C  
B) Country D  
C) Country A  
D) Country B

48. What are economies of scale?
A) The extent to which a country is endowed with resources.
B) The economic and strategic advantages that accrue to early entrants into an industry.
C) The extent to which a country has to import goods.
D) The cost reductions associated with a large scale output.

49. According to Michael Porter, this is an example of a "basic" factor of production.
A) Demographics  
B) Skilled labor  
C) Research facilities  
D) Communication infrastructure

50. Identify one of the most pervasive findings of Porter's study.
A) The relationship between advanced and basic factors is simple and straightforward.
B) Successful industries within a country tend to be grouped into clusters of related industries.
C) The role home demand plays in upgrading competitive advantage has been exaggerated.
D) Chance and government are variables that rarely influence the national diamond.

BONUS (5 POINTS each)
1) Explain Hinduism in less than 10 lines. (I will only read the first 10 lines)
2) Current News: What is today’s news regarding the Google-China problem. Explain in 5 lines. (I will only read the first 5 lines)
