

FACULTEIT LANDBOUWKUNDIGE EN
TOEGEPASTE BIOLOGISCHE
WETENSCHAPPEN

Academiejaar 2003-2004

**PREDICTING RIVER CONCENTRATIONS OF PESTICIDES
FROM BANANA PLANTATIONS UNDER DATA-POOR
CONDITIONS**

**VOORSPELLING VAN PESTICIDENCONCENTRATIES UIT
BANANENPLANTAGES IN RIVIEREN ONDER
GEGEVENSARME OMSTANDIGHEDEN**

door

David E. Matamoros Camposano, M.Sc.

*Thesis submitted in fulfillment of the requirements for the degree of
Doctor (Ph.D.) in Applied Biological Sciences*

*Proefschrift voorgedragen tot het bekomen van de graad
van Doctor in de Toegepaste Biologische Wetenschappen*

op gezag van

Rector: **Prof. Dr. A. De Leenheer**

Decaan:

Prof. Dr. ir. H. VAN LANGENHOVE

Promotor:

Prof. Dr. ir. P. VANROLLEGHEM

Prof. Dr. ir. Peter Vanrolleghem

David E. Matamoros C.

The research reported in this discussion was conducted at the Department of Applied Mathematics, Biometrics and Process Control, University of Gent (Belgium), and partly at the Escuela Superior Politécnica del Litoral (Ecuador).

Acknowledgement

This Ph.D. thesis was made possible through the financial and logistic support of the VLIR-ESPOL Cooperation Agreement. I would like to express my deepest gratitude to my promoter Prof. Peter Vanrolleghem and Prof. María del Pilar Cornejo for their guidance through all my doctoral research. A special recognition is given to Prof. Leo Van Biesen and Mrs. Zobeida Cisneros for their moral, technical and friendly support during all the duration of my research.

There are so many people who were involved, directly or indirectly, to the commitment of this thesis. Patricia, Johanna and Galo were key elements in the logistics. My students, Jimmy, Edwin, Christian, Gloria and Danilo, helped me during the sampling campaigns. Julio Garcia, a dearest friend, took care of logistics in the soil lab and help in some analysis.

Also, I want to thank to all the people in the BIOMATH department. They made me feel like another member of the research team. They were helpful, and even more they were friends to me.

Finally, my eternal gratefulness to my lovely family: my wife Tania, my daughter Mariela, my son David, and my dearest parents. They gave me all the moral support that I needed to go through all my doctoral studies, and complete just another step in my life.

CONTENTS

CHAPTER 1. INTRODUCTION

1.1. BACKGROUND.....	1.1
1.2. WORKING GROUPS	1.2
1.3. RESEARCH GOALS.....	1.3
1.4. THESIS OVERVIEW	1.4

CHAPTER 2. LITERATURE REVIEW

2.1. CURRENT ECUADORIAN WATER QUALITY LEGISLATION	2.1
2.2. FATE OF PESTICIDES IN A WATERSHED	2.4
2.2.1. Chemical Fate Modelling in General.....	2.4
2.2.2. Air.....	2.6
2.2.3. Soil.....	2.7
2.2.4. Water.....	2.11
2.2.5. Biota.....	2.12
2.3. MODELLING ENVIRONMENTAL BEHAVIOUR OF PESTICIDES	2.13
2.3.1. Screening Models – Compartmental Models	2.14
2.3.2. Field-Scale Models	2.16
2.3.3. Integrated Spatially Variable Models	2.18
2.3.4. Sensitivity and Uncertainty Analysis	2.21
2.4. GEOGRAPHIC INFORMATION SYSTEMS AND ENVIRONMENTAL MODELLING.....	2.22

2.5. PESTICIDES USED IN THE ECUADORIAN BANANA SECTOR..	2.25
2.5.1. Existing Statistical Records on Pesticides and Banana Plantations.....	2.25
2.5.2. Pesticide Management in the Ecuadorian Banana Industry	2.29
2.5.3. Laboratory Availability for Pesticide Analysis in Ecuador	2.33
2.6. PROBLEM DEFINITION.....	2.35

CHAPTER 3. DATA GATHERING PROCESS

3.1. INTRODUCTION.....	3.1
3.2. METHODOLOGY	3.1
3.3. SELECTION OF THE STUDY AREA	3.3
3.4. TOPOGRAPHICAL DATA.....	3.4
3.4.1. Available Cartographical Information.....	3.4
3.4.2. Generation of Digital Elevation Model and other needed Topographical Characteristics for the Study Site	3.5
3.5. HYDROLOGICAL DATA	3.8
3.5.1. Existing Flow Gauging Stations	3.8
3.5.2. Field Flow and Cross Section Measurements done in the Research.....	3.9
3.5.3. Watershed Delineation and other hydrological data needed for selected models.....	3.11
3.6. METEOROLOGICAL DATA	3.13
3.6.1. Existing Meteorological Stations.....	3.13
3.6.2. Monthly Precipitation Data.....	3.14
3.6.3. Maximum 24-hour Precipitation	3.21
3.6.4. Air and Dew-point Temperature Data	3.25
3.6.5. Solar Radiation Data.....	3.28
3.7. SOIL DATA	3.31
3.7.1. Soil Sampling Campaigns	3.31

3.7.2. Lab Analysis and Results.....	3.35
3.7.3. Soil Maps (Digital Data) Generation.....	3.37
3.8. LANDUSE DATA	3.41
3.8.1. Existing Land Use Information	3.41
3.8.2. Pesticide Management Data	3.43
3.9. EROSION DATA.....	3.46
3.9.1. Length-Slope Factor (LS).....	3.46
3.9.2. Soil Erodibility Factor (K_s)	3.48
3.9.3. Rainfall – Runoff Erosivity Factor (R).....	3.49
3.9.4. Support Practice Factor (P).....	3.50
3.9.5. Cover Management Factor (C_M).....	3.51
3.10. CROP DATA.....	3.52
3.11. CHEMICAL DATA	3.55
3.11.1. Water and Sediment Sampling Campaigns	3.55
3.11.2. Lab Analysis and Results.....	3.59
3.12. CONCLUDING REMARKS	3.68

CHAPTER 4. PREDICTIVE MODELLING OF PESTICIDE FATE IN RIVERS

4.1. INTRODUCTION.....	4.1
4.2. SCREENING MODELS AS TOOLS FOR PLANNING SAMPLING CAMPAINGS.....	4.2
4.2.1. Model Structure	4.2
4.2.2. Analysis of Results	4.3
4.2.3. Discussion of Results.....	4.7
4.3. SPATIALLY INTEGRATED MODELS.....	4.8
4.3.1. AGNPS Structure.....	4.8
4.3.2. Calibration Process	4.11
4.3.3. Scenario Evaluation	4.26
4.3.4. Comparison with another runoff model: SWAT	4.29
4.3.5. Discussion.....	4.33

CHAPTER 5. GENERAL DISCUSSION AND FUTURE PERSPECTIVES
